PROFESSIONAL SUMMARY

Software engineer and technical lead with professional experience since 2020, owning delivery of multi-app products from architecture to release. As a remote contract Lead Engineer at Devnnova I run engineering for Entrant across mobile, web, admin and backend, and led its migration from a legacy Java/Spring Boot backend to a single NestJS + PostgreSQL service. I set engineering conventions, own API contracts, review code and coordinate with product and stakeholders, while staying hands-on in TypeScript, React, NestJS and Laravel.

TECHNICAL SKILLS

Leadership: Technical delivery, architecture decisions, sprint planning, code review, API contract ownership, stakeholder coordination

Architecture: Modular monoliths, versioned REST APIs, real-time systems, background jobs, caching and rate limiting, legacy migration

Backend: Node.js, NestJS, Express, Laravel, PostgreSQL, Redis, BullMQ, TypeORM

Frontend & Mobile: React, Next.js, React Native (Expo), Vue.js, TypeScript

Quality & Ops: Automated unit/e2e testing, security reviews, Docker, CI/CD, Sentry, Swagger

Integrations: Stripe, Paystack, Flutterwave, Firebase, AWS S3, OpenAI and Claude APIs

PROFESSIONAL EXPERIENCE

Lead Engineer | Devnnova (Contract · Remote) Aug 2023 – Present

- Own technical delivery for Entrant across four codebases (mobile, web, admin, backend): architecture, sprint planning, API contracts, code review and release.
- Led the migration of a legacy Java/Spring Boot backend into one NestJS + TypeScript + PostgreSQL service, removing a second runtime and simplifying deployment and maintenance.
- Defined engineering conventions for the team: versioned REST APIs, schema-per-feature modules, migrations-only database changes, Swagger documentation and automated unit and e2e tests.
- Set up the quality and security workflow (automated tests, code review, contract and security audits) that every feature passes before release.
- Designed a backend of 40+ feature modules with Redis caching and rate limiting, BullMQ background jobs, Socket.io real-time messaging and calls, and Sentry observability.
- Coordinate with product, design and stakeholders to scope MVP vs post-MVP work and keep delivery on schedule.

Web and Mobile Developer | Ecobank Nigeria 2025 – Present

- Develop a mobile-first internal banking operations application with React Native and Next.js, integrated with Node.js and Express services.
- Improved transaction completion speed by 30% through workflow and UI refinements and Redux state management.

Full-Stack Developer | TechVerse (digital agency) Jan 2022 – Aug 2023

- Owned end-to-end delivery of multiple client products at an agency (AltBank, Yummeals, AltDrive), from Figma design through API, admin tooling and release.
- Architected Altmobile, AltBank's device-financing platform: Laravel 11, Filament admin, Inertia React, PostgreSQL, encrypted KYC data and a queued credit-check pipeline.
- Standardised API documentation and Postman collections so client teams and partners could integrate without engineering support.
- Integrated Paystack and Flutterwave payments and partner APIs, and improved performance and deployment workflows.

UI/UX Designer | Hephzibah Edutech 2020 – 2022

- Designed a Figma CRM dashboard for student enrollment and management; user research and interface improvements reduced administrative workload by 40%.
- Worked with developers on the React.js and Tailwind CSS implementation, connecting design decisions to shipped product flows.

SELECTED PROJECTS

Entrant — Relocation & Newcomer Platform: React Native (Expo), Next.js 16, NestJS 11, PostgreSQL, Redis, Socket.io, Stripe. Mobile app, web platform, admin portal and a 40+ module backend.

Altmobile — Device Financing for AltBank: Laravel 11, Filament 3, Inertia + React, PostgreSQL. Subscription and financing flows, KYC, credit checks and a partner API.

Nizom — Business Operations Platform: Architected a modular Next.js + Laravel monorepo (CRM, onboarding, projects, time tracking, invoicing, client portal) and its frontend design system.

EDUCATION & CERTIFICATIONS

OND, Electrical and Electronic Engineering — Moshood Abiola Polytechnic	2020 – 2022
Backend Development Certification — DevTown	2024
Frontend Development Certification — DevTown	2023
Microsoft Professional Program in Front-End Web Development	Jun 2023
Microsoft Learn Student Ambassador	2025
